History of the Centre for Knowledge and Technology Transfer of the Charles University ory of the Centre for Knowledge and Technology Transfer of the Charles University

This text provides information about the history of the Centre for Knowledge and Technology Transfer of the Charles University (CPPT UK). CPPT UK has celebrated its 10th anniversary. In the past 10 years it has achieved a lot. The Centre has been awarded and participated in many successful projects, it has founded a Council for Commercialization, created the University Innovation Network, acquired support for the Proof of Concept stage, created a study program called Management of Science and Innovations, it has joined Junior University, organized the 1st year of an innovation fair at the Charles University and, last but not least, it has expanded its team to 13 regular employees and 40 scouts and coordinators who operate at faculties and other organizational units of the Charles University.

The Centre for Knowledge and Technology Transfer of the Charles University was established based on a project called the Centre for Knowledge and Technology Transfer of the Charles University in 2005.

The project consisted of two stages:

- Stage 1 - development of a network of scouts and preparation of a basic analysis for the purposes of establishment of the Centre
- Stage 2 - development of an organizational chart and analysis of the CPPT organizational structure

Establishment of the Centre for Knowledge and Technology Transfer of the Charles University.

Educational project Innovative business activities of the Charles University (IPUK) structured into 4 modular courses:

A: From knowledge to use and profit

B1: Efficient knowledge management – technology reporters

B2: Efficient knowledge management - quality managers

C: Academic institutions as a source of innovation

The project **Transnational Technology Transfer Manager** Application of the European educational model at the Charles University and the project **Knowledge and Technology Transfer**.

Pre-seed I and Pre-seed II

The objective of the Pre-seed I project was to strengthen the Charles University structure, to provide professional services to RD workplaces of the University outside Prague, to enhance awareness and level of protection of intellectual property at university workplaces and to look for RD projects suitable for commercialization. The subsequent project Pre-seed II was supposed to increase intensity of protection of intellectual property and verification of commercialization potential of approved activities in the area of molecular biology and biotechnology.

Council for Commercialization

Is a rector's counseling body in the area of commercialization of science and research results at the Charles University

3. kolo	14	7	5,4
4. kolo	4	4	2,9
CELKEM	72	23	18

The Centre for Knowledge and Technology Transfer of the Charles University was among the first to have the honor of reading lectures at the Junior University organized every year by the Centre for Lifelong Learning of the Charles University.

Catalogue of Services

The **Catalogue of Services** was developed in September **2016** in cooperation with partners from all parts of the university. The catalogue contains clear information about scientific teams at the Charles University and about services they may provide to your company, organization or authority. The Charles University is able to offer services of leading experts in many fields. Currently, a new version of the Catalogue is being prepared.

Via Carolina Fair

Via Carolina is a fair intended for presentation of innovations, contracted research, knowledge and technology transfer and lifelong learning. The Charles University uses an interactive form to offer results of research, as well as expert and technology capacities to external partners. The first year of Via Carolina took place in May 2017 and the second year has been planned for 2019.

In cooperation with the Centre for Lifelong Learning at the Charles University we have also prepared a **Catalogue of Lifelong Learning for the Application Sphere**. The Catalogue presents various courses across specializations and faculties at the university. The Centre for Knowledge and Technology Transfer of the Charles University was involved in the design and graphics of the Catalogue. The content of the Catalogue was provided by the Centre for Lifelong Learning. One of the offered courses is called Management of Science and Innovations.

The Centre for Knowledge and Technology Transfer of the Charles University is also participating in various projects.
